

SUPPLIER PRECINCT

SUPPLIER PRECINCT

Establish in the Supplier Precinct and be part of Australia's premier naval industry hub.

Techport Australia is a vibrant, world-class shipbuilding, defence and industry precinct developed by the Government of South Australia. It is home to some of the country's largest defence contracts, including the \$8 billion Air Warfare Destroyer project and the multi-billion dollar, through-life-support contract for the Collins Class submarines.

Techport Australia's Supplier Precinct offers an outstanding opportunity for businesses to locate alongside anchor tenant ASC Pty Ltd. Stage one of the precinct covers 14 hectares and is over 50% sold. Expansion areas exist to accommodate multiple primes and support future shipbuilding and maintenance opportunities.

Babcock clean room

Steel plate cutting at Ferrocut

WORLD CLASS COMPANY

Join some of the world's leading defence companies at Techport Australia.

Air Warfare Destroyer Alliance

The AWD Systems Centre is the hub of the AWD project accommodating AWD Alliance partners, the Defence Materiel Organisation, Shipbuilder ASC, Hobart Class Combat System Systems Engineer Raytheon Australia and capability partner representatives. The Alliance is managing the design, schedule, budgets and major procurements of the AWD project.

AMI Marine

AMI Marine is a wholesale distributor and agent for many leading marine, electronic, environmental, offshore and safety products. With 25 years experience in the marine industry, the company has established itself as a respected leader in the market place, and has developed an extensive distribution network across Australia, Southeast Asia, and globally.

ASC Pty Ltd

Techport Australia's anchor tenant ASC currently has two multi-billion dollar naval contracts: construction of the Air Warfare Destroyers and maintenance of the Collins Class submarines.

Babcock Pty Ltd

Babcock Pty Ltd is a subsidiary of the Babcock International Group PLC. Securing contracts from Raytheon Australia and ASC it is delivering key systems for the Air Warfare Destroyer project.

Ferrocute

Ferrocute is one of South Australia's leading profile cutters. The company provides services and products to a range of sectors including defence, mining, construction and specialist fabrication and is delivering cut steel plate for the AWD project.

Le Fevre Developments

Le Fevre Developments is a start up operation focusing on high-spec engineering solutions for defence and other industries.

Maritime Skills Centre

The Maritime Skills Centre provides technical and trade skills for the AWD project and when capacity permits, is available for third party commercial training activities.

National Crane Hire

National Crane Hire/McAleese Transport conduct mobile crane hire and heavy haulage operations and is establishing their South Australian head office at Techport Australia.

Pacific Marine Batteries

Pacific Marine Batteries is a leading manufacturer of high-quality submarine battery systems. It has been involved with the Collins Class submarines since their inception. PMB has been engaged by the Commonwealth in initial Future Submarine capability studies.

Raytheon Australia

Raytheon Australia is the Hobart Class Combat System Systems Engineer – a key member of the AWD Alliance team building Australia's air defence capable ships, the new Air Warfare Destroyers.

CASE STUDY

Babcock Pty Ltd

Babcock is one of the world's leading naval support providers with presence in the UK, USA, Canada and Australia. The Australian business was established in Adelaide to initially manage the supply of equipment for the Collins Class submarines, and is now Babcock's headquarters for their entire Pacific based operations.

Babcock constructed a new, purpose built facility at Techport Australia in 2009. Currently home to 60 employees, the building accommodates the company's expanding engineering team, along with a modern assembly and test workshop. Successfully securing contracts from Raytheon Australia and ASC to provide key systems for the Air Warfare Destroyer program, Babcock has strong growth plans in Australia focused initially on support to naval platforms.

"Babcock has a strong foundation in Adelaide and, given the South Australian Government's major investment at Techport Australia; it is the ideal location for us to implement a major expansion of our naval business in Australia." Craig Lockhart – Chief Executive Officer.

SECURE YOUR SITE TODAY

A limited number of prime industrial sites remain available in the Supplier Precinct.

Le Fevre Developments building

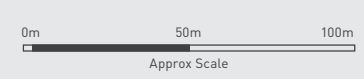

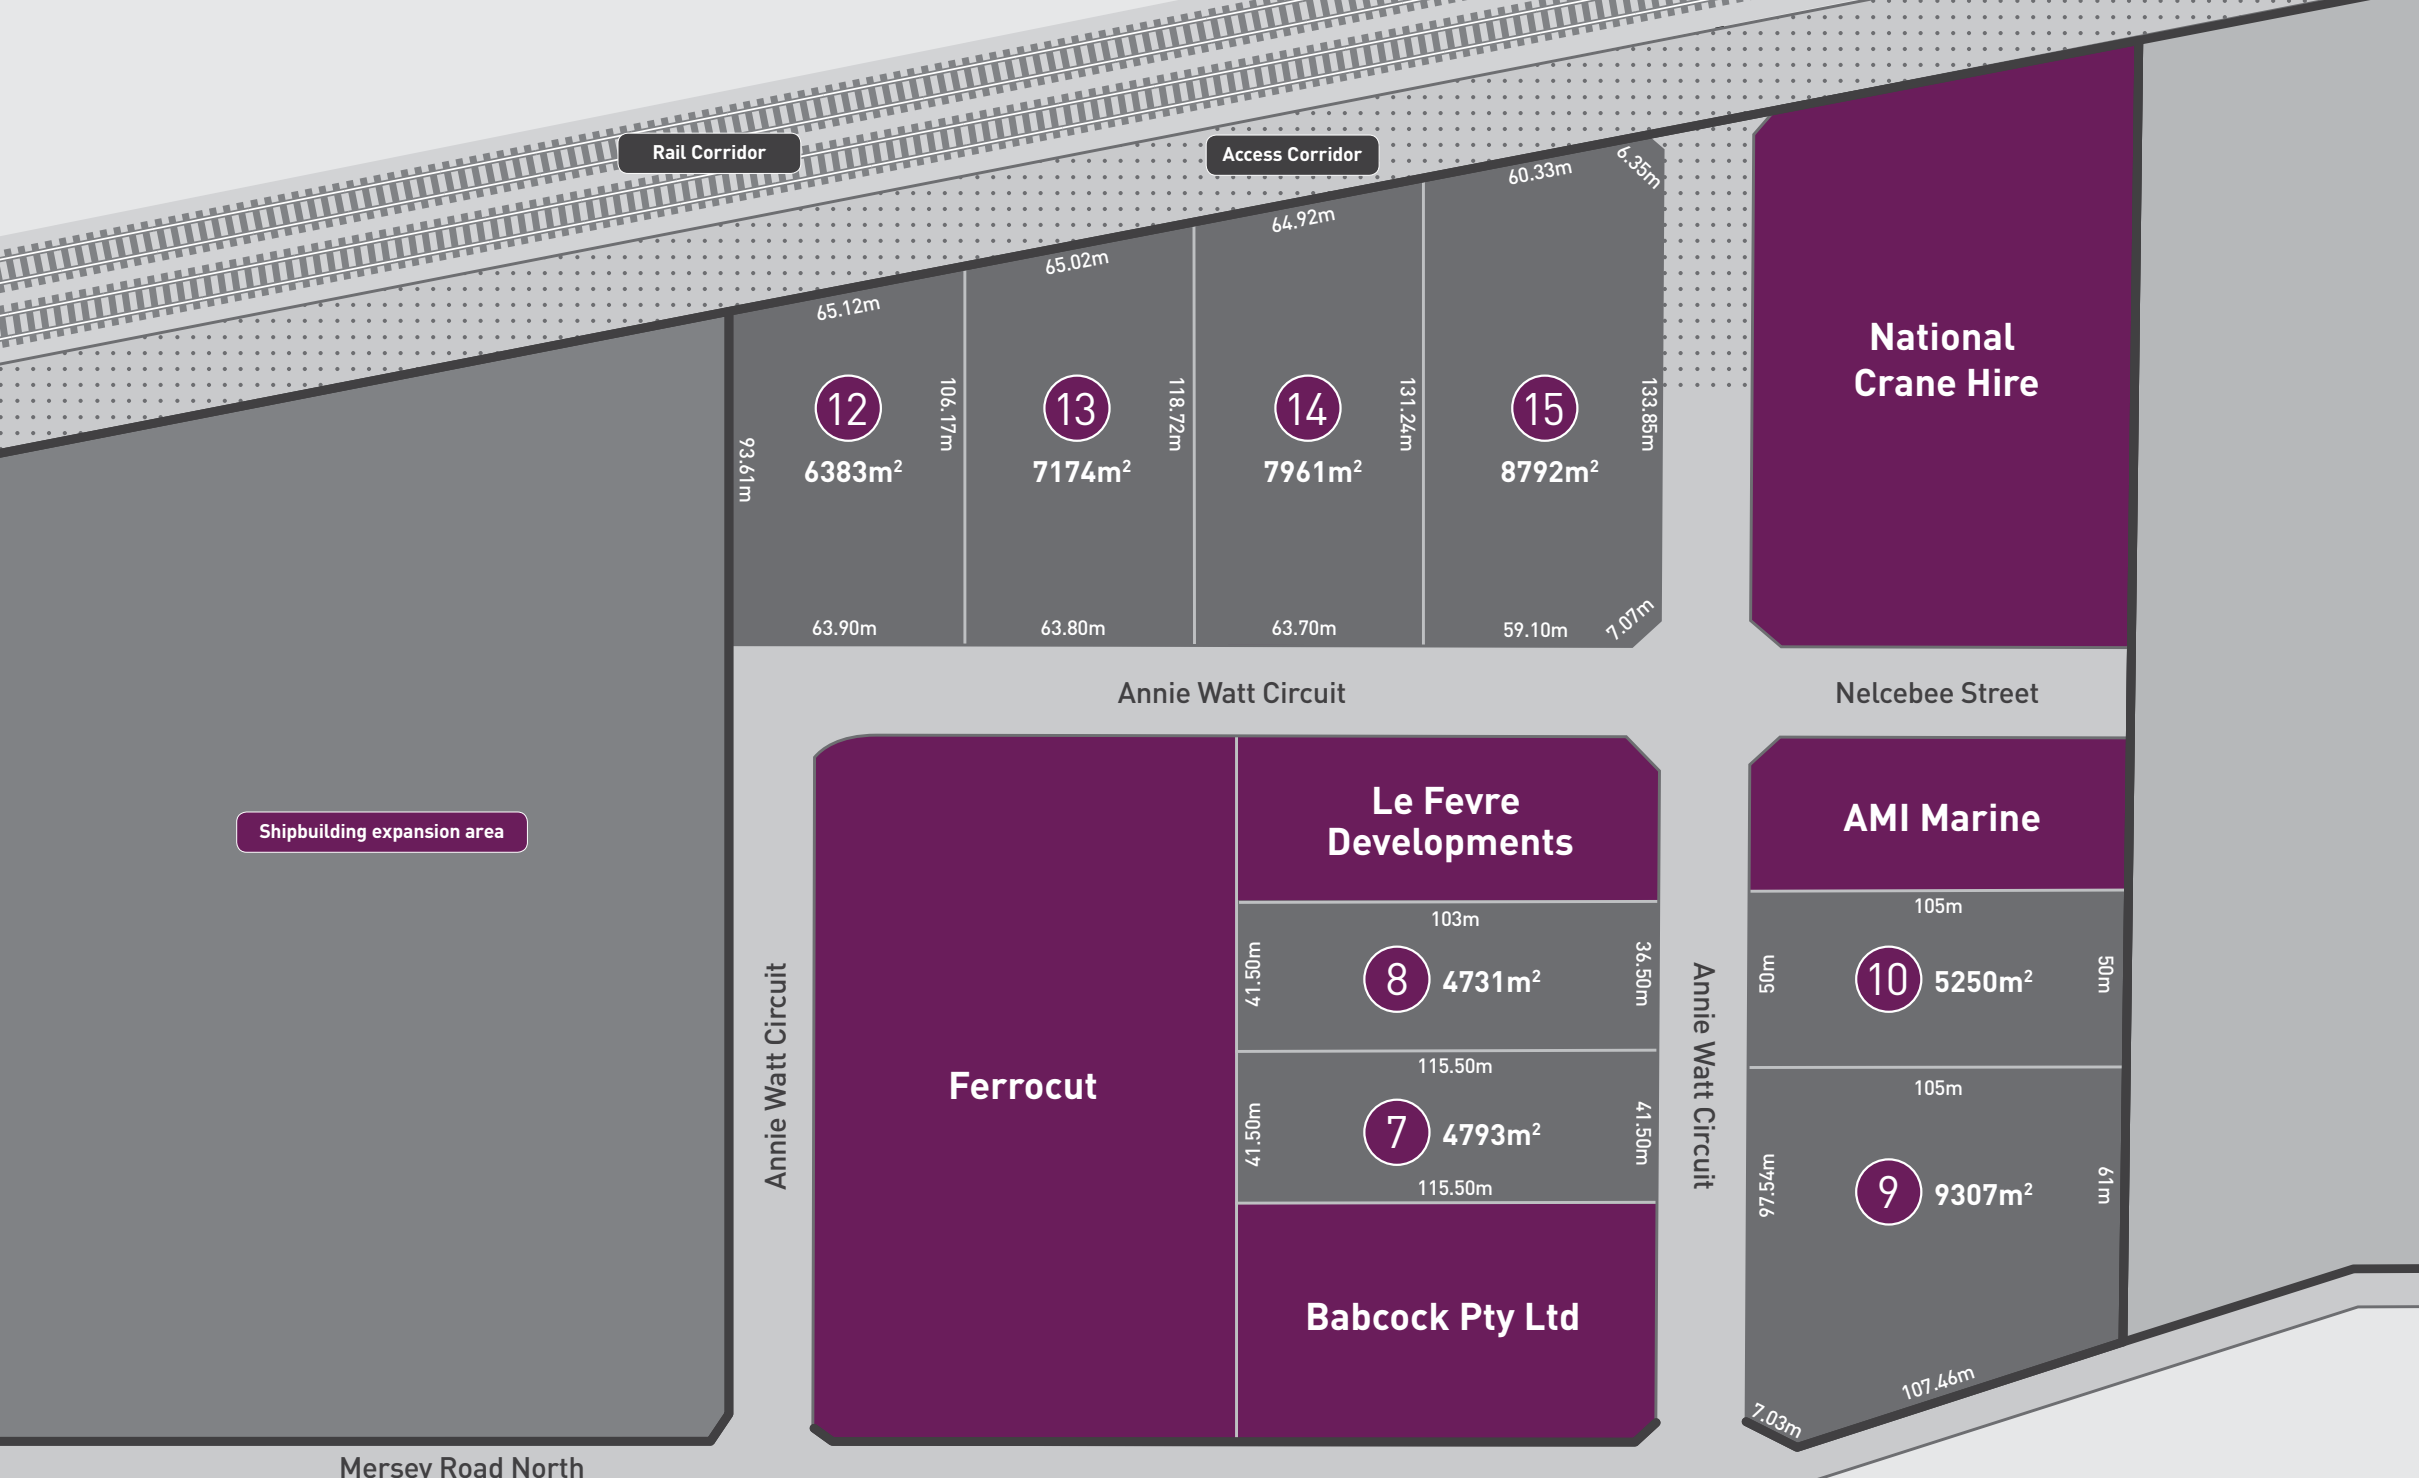

Techport Australia is ideally suited for companies in:

- naval and commercial shipbuilding
- ship repair and maintenance
- systems design and integration
- metal fabrication and module construction
- blast and paint
- warehousing and logistics
- precision manufacturing
- electronic component supply.

This fully integrated and masterplanned development features:

- flexible allotment configuration from 4700m² to 30,000m²
- flexible leasing options and turn-key design and construct solutions
- fully-serviced and prepared sites ready for development
- Torrens-titled allotments
- national transport network access - including road, rail and deep sea international port
- SABRENet high speed optical fibre network link to major research, defence and educational facilities across Adelaide
- development guidelines to ensure consistency of quality, and sustainability of all development.
